

AI-ML GC 2025–26 Rulebook

Collaborating Partner: Kelp

Kelp is a platform that provides decision-making tools for the alternative investment industry. Its suite of tools is designed to enhance productivity and accelerate decision-making across the investment lifecycle.

1. Eligibility & Team Formation

Eligibility: The competition is open to all enrolled students of the institute.

Team Composition: Participants must compete in teams representing their respective hostels. Each team must consist of **2–4 members**.

Cross-Hostel Teams: All members of a team must belong to the **same hostel**. Cross-hostel teams are not permitted.

Team Registration:

- Registration will be conducted via a **Google Form floated by Web and Coding Club (WnCC)**.
- Registration Form Link: <https://forms.gle/VvaPJUUYH9Hm52wW9>
- Each team must nominate a **Team Leader**, who will be responsible for all submissions.
- The **team name and hostel name** must remain **consistent across all forms and submissions**.

Anonymity & Fairness:

- At no point during the hackathon or evaluation will the collaborating company (**Kelp**) be informed of the hostel or personal details of any team.
 - Only the **team name** will be visible to the company to ensure fairness and unbiased evaluation.
-

2. Timeline

Activity	Date / Duration
Registration Start	Thursday , 15th January (10:00 pm)
Problem Statement Release	Friday, 16th January (8:30 pm)
Registration Deadline (Hostel-wise)	Tuesday, 20th January (11:59 pm)
Development Phase	3 Weeks (16th January onwards till 6th Feb)
Submission Deadline	7th Feb 2026, 2:00 pm
Presentation Round	After 9th February
Final Results Announcement	On or before 12th February (subject to change due to midsem)

3. Hackathon Structure

- This is a **3-week AI/ML development hackathon** conducted in collaboration with **Kelp**.
 - AI-ML GC is a High Prep General Championship event worth 200 GC points.
 - Participants will work on the released **Problem Statement (PS)** during the development phase.
 - After the development phase, a **Presentation Round** will be conducted, where shortlisted teams will present their work to the jury.
-

4. Submission Guidelines

Submission Form:

- All submissions must be made through the **official Google Submission Form**.
- Submission Form Link: <https://forms.gle/dGvD9ikX126CRUzZ7>
- Only the **Team Leader** is permitted to submit on behalf of the team.

Required Submission Items:

- Team Name
- Hostel No
- Team Leader Name and Contact Information
- Project repository / drive link (as specified in the PS)
- Any additional documentation required as per the Problem Statement

Consistency Requirement:

- The **team name and hostel name must exactly match** the details provided during registration.
 - Any mismatch may lead to disqualification.
-

5. Judging Criteria

Teams will be evaluated on the following parameters (subjected to change depending on problem statement):

Criterion	Description
Technical Correctness	Accuracy, completeness, and validity of the AI/ML solution
Innovation & Approach	Novelty, creativity, and problem-solving methodology
Model Performance	Appropriateness of models, evaluation metrics, and results
Presentation & Explanation	Clarity of presentation, understanding of solution, and ability to answer questions
Code Quality & Documentation	Readability, structure, reproducibility, and documentation

The detailed weightage will be shared separately, if applicable.

6. Prizes

Position	Prize worth
First Prize	₹1,00,000
Second Prize	₹40,000
Third Prize	₹20,000

Additional recognitions may be announced at the discretion of the organisers.

Due to institute rules, the prize amounts **may not be awarded as direct cash**. Instead, winners will receive **prizes worth the same amount**.

7. GC Points Allocation (Total: 200 Points)

AI-ML GC is a **High Prep** event, and **hostel GC points** will be awarded based on a hostel's overall performance across participation, shortlisting, and final results.

7.1 Definitions

For each hostel h :

- T_h = number of **valid team submissions** from hostel h (submitted on time + meets minimum PS requirements).
- S_h = number of teams from hostel h **shortlisted for the Presentation Round**.
- W_h^1, W_h^2, W_h^3 = number of teams from hostel h that finish **1st / 2nd / 3rd** overall.

To reduce “spam registrations” and reward genuine participation, **only valid submissions count** toward T_h .

7.2 Hostel Performance Score (3 components)

We compute a hostel score using three components:

(A) Participation Component (max weight: 30%)

$$P_h = \frac{\sqrt{T_h}}{\max_k \sqrt{T_k}}$$

(B) Shortlisting Component (max weight: 20%)

$$L_h = \frac{S_h}{\max_k S_k}$$

(C) Final Results Component (max weight: 50%)

Define a weighted podium value:

$$R_h = 1.0 \cdot W_h^1 + 0.7 \cdot W_h^2 + 0.5 \cdot W_h^3$$

Normalize it:

$$F_h = \frac{R_h}{\max_k R_k}$$

Now combine:

$$Score_h = 0.30 \cdot P_h + 0.20 \cdot L_h + 0.50 \cdot F_h$$

7.3 Converting to GC Points (out of 200)

The hostel with the highest Score gets **200 points**, and others are scaled proportionally:

$$GCPoints_h = 200 \times \frac{Score_h}{\max_k Score_k}$$

This guarantees:

- Top hostel gets exactly 200 points

- Others get fair proportional points based on **participation + shortlisting + wins**

7.4 Tie-breaks (if needed)

If two hostels get the same GCPoints after rounding, ties are broken in this order:

1. Higher **Final Results Component** ($F_{\square}$)
2. Higher **Shortlisting Component** ($L_{\square}$)
3. Higher **Valid Submissions** ($T_{\square}$)

7.5 Anti-abuse / Validity Clause

- Organisers may **invalidate sham/empty submissions** that do not meet minimum PS requirements.
- Only **on-time valid submissions** are counted for $T_{\square}$.

8. Resources & Support

- The problem statement, relevant company details, and sample outputs will be shared officially at the time of PS release.

9. Plagiarism & Fair Play

Originality: All submissions must primarily be the original work of the participating team.

Allowed Resources: Use of open-source libraries, pretrained models, frameworks, and standard academic references is permitted, provided proper attribution is given where required.

Prohibited Conduct:

- Copying or submitting another team's work
- Submitting previously completed or externally commissioned projects
- Misrepresentation of authorship or data

Any violation will result in **immediate disqualification**.

10. Instructions for Participants

- Carefully read the Problem Statement before starting development.
- Maintain a clean and well-documented workflow throughout the hackathon.
- Prepare for the presentation round with clear explanations of design choices, models, and results.
- Ensure timely submission before deadlines; late submissions will not be accepted.
